

01 Are You a Candidate?

Hair restoration takes time. Consistency matters.

Read the complete Root Authority manual before your first treatment.

Use the Norwood Scale for men and the Ludwig Scale for women to see where your hair loss may fall.

Men — Norwood Scale

Men — Norwood Scale — Stage 1 through Stage 7

Stages 1-2 — Little to early hair loss. Stage 2 is a great time to start supporting your scalp and follicles.

Stages 3-5 — Noticeable recession, thinning, or crown loss. This is an ideal time to begin consistent treatment.

Stages 6-7 — Advanced hair loss. Treatment may still be worth trying, but results may be more limited, especially in areas that have been completely bald for a long time.

Women — Ludwig Scale

Women — Ludwig Scale — Stage 1 through Stage 3

Stage 1 — Early thinning with good overall coverage. A great time to start.

Stage 2 — Noticeable thinning through the part or crown. Consistent treatment may still help support existing follicles.

Stage 3 — Advanced thinning with reduced density. Treatment may still be worth trying, but expectations should be realistic.

Important: These scales are visual guides only. They do not determine whether a follicle can produce new hair, and results will vary.

02 Root Authority: Before You Begin

01

Read the Manual

Read the Root Authority manual completely before your first use.

02

Clean Everything

Wash and dry your:

HAIR

SCALP

HANDS

Begin with a clean scalp free from styling products, oils and fragranced products.

03

Prepare Your Needle

Select one new, single-use needle and fill the reservoir with Crown Boost. Never reuse a needle.

04

Retaining Ring

Clean the retaining ring thoroughly before every use of the machine.

Securely attach the retaining ring before installing or operating the needle.

Never operate without the retaining ring in place.

03 Your Settings

FLOW REGULATOR

1-2

Set the serum flow to 1-2.

Avoid setting 3. This may dispense Crown Boost too rapidly.

DEVICE OPENING

Half / Full

Sensitive Scalp: Half Open.

Most Users: Full Open.

SPEED

4-5

Recommended speed: 4-5. If you have a particularly sensitive scalp, you may operate at a slower speed.

04 Treatment Pattern

Work slowly and methodically through the areas of concern.

Pass One

Move in straight lines: Front to Back or Back to Front. Gradually work across the entire treatment area.

Pass Two

Change direction: Left to Right or Right to Left. Again, move slowly across the treatment area.

Optional: Small Circles

You may also work using small, controlled circular motions. Be careful when treating areas with longer existing hair, as hair may become caught during circular movements.

WHEN FINISHED

Remove and discard the needle.

ONE NEEDLE. ONE TREATMENT. ONE USE.

Never clean, save or reuse a used needle.

05 The First 72 Hours

Mild temporary scalp sensitivity may occur after treatment and can last for up to approximately 3 days.

DURING THE FIRST 72 HOURS: AVOID

Direct or prolonged sun exposure

Fragranced scalp or hair products

Excessive sweating

Products that irritate the treated scalp

Copper Peptide Mist

Spray the treated areas with Copper Peptide Mist 2–3× daily for the first 72 hours. This helps support hydration and the post-treatment scalp environment.

Crown Boost

Crown Boost may also be applied directly to the treated areas between sessions. Keep in mind that using Crown Boost between Root Authority treatments will increase product usage, meaning you may need to replenish your serum sooner than the typical 4-month average.

o6 Your Treatment Schedule

EVERY 10–14 DAYS

Repeat your Root Authority scalp treatment approximately every 10–14 days. Consistency is more important than trying to accelerate the process. Hair growth is a lengthy biological process.

EXPECT TO COMMIT FOR:

MINIMUM

4 Months

COMMON COMMITMENT

6–12 Months

Think of Root Authority as an ongoing investment into your scalp and hair environment—not a one-time treatment. Your individual timeline will vary.

o7 Maintenance

Once you have reached your desired result, don't simply stop supporting your scalp.

MAINTENANCE PROTOCOL

1 Root Authority Treatment Every 6-8 Weeks

Regular maintenance is recommended to continue supporting the scalp and follicles after reaching your goal.

Remember

01

Treat every 10–14 days

02

Commit for a minimum of 4 months

03

Expect that your journey may take 6–12 months

04

Maintain approximately every 6 weeks after reaching your goal

o8 Add Follicle Defense

Root Authority works from the outside in.

Follicle Defense works from the inside out.

Follicle Defense is designed to complement the Root Authority system by providing nutritional support for multiple factors involved in healthy hair.

FOLLICLE DEFENSE SUPPORTS:

DHT Support

Saw Palmetto, Beta-Sitosterol, Pumpkin Seed Oil, Stinging Nettle and Pygeum support pathways associated with DHT and healthy hair maintenance.

Hair Structure

L-Cysteine, L-Lysine, MSM and Biotin provide nutrients associated with keratin and healthy hair structure.

Scalp + Follicle Nutrition

Zinc, Copper, Vitamin D3 and other nutrients help support normal follicle and scalp function.

Antioxidant Support

Green Tea, Vitamin C and Tocotrienols help provide antioxidant support against oxidative stress.

Skin + Nail Support

Several nutrients in Follicle Defense—including Biotin, Zinc, Vitamin C and amino acids—also support healthy skin and nails.

HOW TO TAKE FOLLICLE DEFENSE

4 Capsules = 1 Daily Serving

120 Capsules = 30-Day Supply

Take either: 4 capsules once daily, or 2 capsules + 2 capsules. Split dosing is available for convenience. Follow the product label and do not exceed the recommended serving.

The Complete System

ROOT AUTHORITY

Mechanical scalp treatment + targeted Crown Boost delivery.

Important Safety Information

Individual results vary. The Norwood and Ludwig scales are visual classification systems and are not diagnostic tools. Do not use Root Authority over an infected, inflamed, injured or otherwise compromised scalp. Discontinue use and seek medical guidance if you experience severe, persistent or unexpected irritation. Consult your healthcare professional before using dietary supplements if you are pregnant, nursing, taking medications or have a medical condition.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease. Individual results vary. Consult a healthcare professional before beginning any new treatment, particularly if you have a skin condition, are taking medication, or are pregnant or nursing. Must be 18 or older to purchase.

DON'T WAIT UNTIL IT'S GONE.

Take care of your hair today, so you can keep it tomorrow.
